

FVBS Automatic Number Plate Recognition

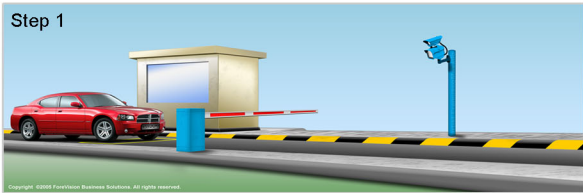

Need to Monitor highways and roadways, or Control Vehicle Access Automatically?

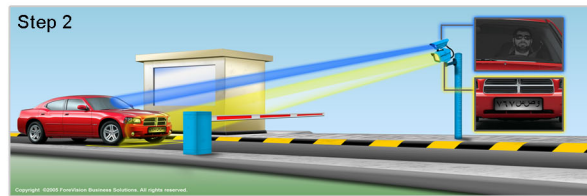

ANPR (Automatic Number Plate Recognition) is a solution, which automatically recognizes the number plates of stationary or moving vehicles using live stream from cameras. The solution involves some key components such as ANPR engine, ANPR Cameras, triggering device, Software, and Database.

SecuAccess

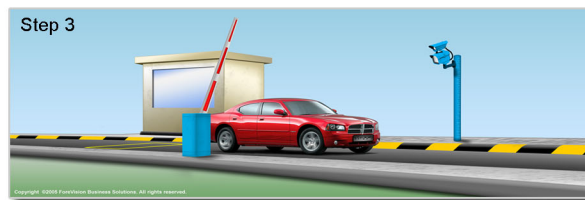

Looking to secure your premises, then Secu Access is what you need. The solution works with automatic barriers, loop detectors and many other devices. Our comprehensive software provides a full range of features. In addition, the software can be customized to meet specific customer needs. Secu Access is perfect for anyone who wants to control and monitor parking or highly secure areas.

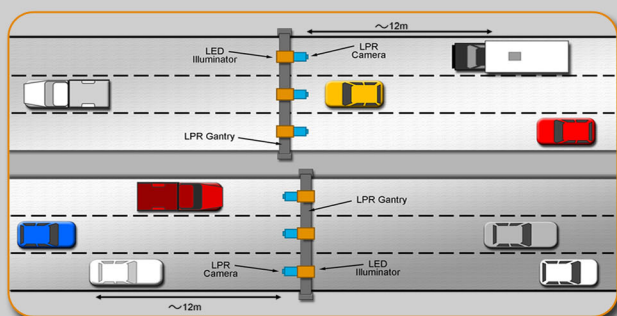

The vehicle approaches the secured area and starts the cycle by passing over a magnetic loop detector.

The camera takes a picture of the number plate and driver, reads the number plate information, and stores the images.

The ANPR unit checks a predefined lists of authorized vehicle, and if found, it signals to open the barrier, or provides the gate operator with the identified Number Plate information and pictures of the Number Plate as well as Driver to authorize the opening of the gate.

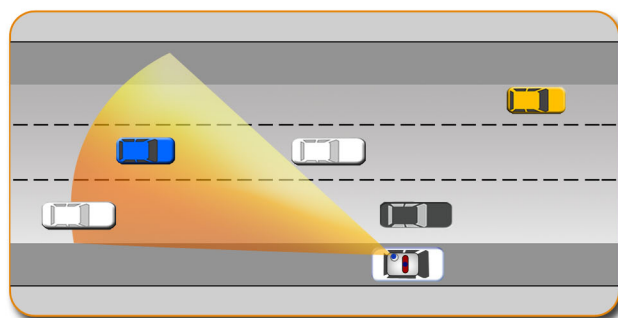

SecuFlow

Highway's and road ways are no longer safe for criminals and traffic violators. With Secu Flow, vehicles status is monitored by the system. Therefore if a car is stolen, unregistered, speeding, or wanted, visual and sound alerts can be generated as well as notification through email, fax, or SMS. Make publics safety your priority by providing safe and secure highways and roadways.

SecuMobile

A truly versatile system transforms any vehicle into a mobile ANPR system. A PTZ ANPR Camera is mounted on top of a vehicle and an on-board mobile PC with touch screen monitor is equipped on the dash board. The operator simply parks his car along a road side and begins monitoring traffic, capturing data such as vehicle status, traffic flow, speed violators, and much more. The equipment can be transferred to another vehicle quickly making it truly mobile. Secu Mobile is perfect for areas where mounting of a fixed ANPR system is not possible.

Features

- Superior Recognition Rate
- Recognizes both Arabic and Latin Characters
- Multilingual
- Check Vehicle Status (Watch listed or Black listed)
- Alerts for restricted, wanted, or speedy vehicles (up to 180 Km)
- Define different classifications such as employees, VIP's, and visitors.
- Control Access Times(e.g. 9am-5pm)
- View Reports
- Overview cameras provide traffic monitoring
- Day/Night Operational
- Customizable features available
- Live Monitoring

Note: Customizable features available
